CORPORATE OVERVIEW

JSI (www.jsitelecom.com) is a privately owned company with offices in Canada, USA, UK and Australia. The position listed below is located in the Kanata, Ontario, Canada.

JSI was founded in 1979, currently employs over 300 people worldwide and has an excellent track record as a highly successful and profitable company with a reputation for exceeding customer expectations. Our long-term partnerships and customer base have allowed us to become recognized leaders in designing and developing acquisition, collection, and analysis solutions for the law enforcement and intelligence communities. JSI's Unified 4Sight system offers a versatile suite of solutions for data management and allows our customers to combine any number of disparate data sources into a highly intuitive and visually focused platform.

In accordance with the Accessibility for Ontarians with Disabilities Act (AODA), JSI will provide accommodation, accessible formats and communication supports for the interview process, upon request.

Software Developers (JOB # SWE-RM-2018-001)

JOB SUMMARY

The successful candidate will contribute as part of our agile teams in a casual work environment in which team work, open communication and discussion are encouraged. Powerful developer workstations are used in conjunction with the latest Microsoft and Linux technologies to produce truly enlightened solutions. We are looking for a variety of skills from C# running on Windows to Java running on Linux with bits of Ruby thrown in.

Mandatory Skills

- Phenomenal problem solver
- Proven history of getting things done (e.g. not just a thinker, but someone capable of cranking out a lot of high quality code, and finishing the job)
- Team player – able to share, mentor, code review and check their ego
- Excellent verbal communication
- Committed to continuous professional development
- University degree in Computer Science or related field
- Eligible for up to a top secret level security clearance

Desired Technical Skills

- Agile development experience, including the use of automated unit and integration tests
- Enterprise development experience (large databases, multi-tier applications)
- Multi-team development environment experience
- Product developer (vs. internal tools developer or contractor)
- Experience working with Big Data
- 2+ years of experience with C#, C++ or Java
- Microsoft WPF experience
- Linux
- Keen developer – coding in your spare time

Bonus Skills:

- Solr
- Cassandra
