Corporate Overview

JSI (www.jsitelecom.com) is a privately owned company, comprised of over 325 employees in offices located in Canada, the US, Germany and Australia.

JSI was founded in 1979 and has a track record as a successful and profitable company with a reputation for exceeding customer expectations. Our customer base and long-term partnerships have positioned JSI as a market leader in investigative analysis solutions. JSI's 4Sight suite of products, specializing in data processing and analytics, offers versatile solutions that allow our customers to combine any number of disparate data sources into a highly intuitive and visually focused platform. With 4Sight, our customers spend less of their time working with their data and, instead, see patterns, understand trends and gain perspective.

In accordance with the Accessibility for Ontarians with Disabilities Act (AODA), JSI will provide accommodation accessible formats and communication supports for the interview process upon request.

This position is located in our Ottawa, Ontario office and reports to the Manager IT.

SharePoint Developer

JSI is looking for a full time intermediate to senior level SharePoint Developer to work on internal development initiatives and projects in collaboration with users and other developers. As a flexible and able individual who enjoys solution development, you will be working with the IT department and the various JSI business units to help design, develop, and implement creative solutions to meet business goals.

Responsibilities

- Co-ordinate with stakeholders and end-users to gather business requirements and translate them into effective technical solutions
- Development (programming), implementation and testing of custom solutions
- SharePoint and web-based enterprise application design; front-end site administration including site creation, user access and web page configuration
- Development of architecture and design documents that describe the corporate SharePoint environment and custom solutions
- Provide troubleshooting, system administrative and technical support for SharePoint and integrated solutions
- Collaborate with external support teams to ensure adherence to enterprise governance, policies and procedures where applicable
- Responsible for change management (upgrades, etc.) and other functions necessary to keep environment up to date and operational

Required Skills

- 3+ years of .NET / web application development, working with SharePoint 2013/2016, C#, and PowerShell
- Experience working with SharePoint client/server API's including the server side object model, CSOM, JSOM, REST and SOAP.
- Experience developing solutions using the SharePoint workflow engine, using SharePoint Designer and Visual Studio.
- Experience customizing the look and feel of SharePoint sites and pages using HTML, CSS, XLST, and JavaScript/jQuery.
- Experience with SharePoint solution deployment methods
- Proven experience designing and developing custom solutions using SharePoint to meet required business needs.
- Strong understanding of SharePoint authentication methods including claims-based authentication with NTLM and forms-based authentication with .NET membership database.
- Strong understanding of security and access methods in SharePoint sites, lists, and pages.
- Experience with customization tools such as SharePoint Designer and InfoPath
- Understanding of customizing the search experience in SharePoint, using scopes, search schema, display templates, and query rules.
- Sufficient knowledge of out-of-the-box SharePoint capabilities to determine if new business requirements can be met with configuration rather than customization
- Front-end administration via the SharePoint UI
- SharePoint 2013/2016 back-end administration experience using Central Administration and/or PowerShell
- Excellent written and verbal communication skills and troubleshooting skills
- Strong attention to quality and detail

Desirable Skills

- SQL Server experience including Reporting Services in SharePoint integrated mode
- IIS configuration and URL Rewrite module
- Requesting, installing, and renewing SSL certificates in IIS/SharePoint
- SharePoint upgrade/migration experience
- Working knowledge of SharePoint running in a virtual environment
- Experience resolving issues through the use of Event Logs and SharePoint Health Analyzer
- Strong interpersonal skills and the ability to deal with all levels of management

If you are interested in applying for this position, please submit your cover letter and resume to HR@jsitelecom.com before Thursday, February 21, 2019.
